

# Environmental and Sustainability Policy

---

**Innovate Recycle is focused on playing its part in moving towards a healthier and sustainable planet and is therefore committed to minimising the environmental impacts of our business operations**

## **Our commitment is to:**

- Ensure our operation is designed and implemented to minimise resource use and maximise recovery of materials
- Once operational, continuously improve our environmental performance
- Reduce our consumption of energy, water and other resources
- Measure and take action to reduce resource use and carbon footprint of our business activities
- Minimise the waste produced from our activities and where produced ensure that the principles of the waste hierarchy are followed to ensure reduction, re-use and recycling are applied
- Manage our operations to prevent pollution
- Comply as a minimum with all relevant environmental legislation
- Monitor and review our environmental performance

## **To meet our commitments, we will:**

- Ensure energy supply for our operation is from a zero carbon and renewable source
- Ensure our material produced is of sufficient quality to replace virgin materials, aligned to the end of waste criteria
- Ensure all waste is segregated and handled in such a way as to maximise the recovery or re-use
- Monitor key objectives and targets for managing our environmental performance at least annually
- Review our Environmental and Sustainability Policy regularly
